

AWILCO presents FRIWO Power Supply Module with 150 Watts Output and Leakage Current $\leq 100\mu\text{A}$

AWILCO is proud to present the new FRIWO Power Supply OF150
- The first member in a new family of Open Frame Power Supplies

Based upon the experience in design and manufacturing of more than 1 Billion power supplies and battery chargers, FRIWO is offering several interesting features: This OF150 comes with an output voltage of 24 VDC at 6.25 Amp nominal current, other output voltages can be made available.

These values are delivered without a cooling fan, with normal convection at ambient temperatures up to 60°C / 140°F. With an efficiency above 90% and a very compact foot print of 140 by 85 mm (5.5" x 3.3" approx.) at a height of 38 mm (less than 1.5"), this unit is

ideal within medical and measurement equipment, manufacturing and control systems, as well as office and communication devices.

With a wide range input 100 to 240 VAC at 47 to 63 Hz and safety certification to UL/EN/IEC 60950 and UL/EN/IEC 60601-1 at leakage current values of less than 100µA, the OF150 allows world wide use. Its output is protected against over voltage, over current, and short circuit. These features, combined with the safety approvals, make FRIWO's OF150 a good value solution for an abundance of applications.

AWILCO is ready to provide you with further information on FRIWO products.

About AWILCO

AWILCO was founded in 1971. Our goal is to provide you with high quality power supplies and chargers through standard and custom designed products.... affordably and easily. AWILCO has its main office in Denmark and a sales office in Stockholm.

The professional staff in Denmark and Sweden is able to help you with all questions regarding power supplies and battery chargers. If the large standard range of products does not meet your requirements, our skilled service crew is ready to modify the products to fit your needs. Together with our strong partner FRIWO we are able to offer the correct solution to power your ideas.

We focus on quality, reliability, service and environment - in all aspects of the supply chain. www.awilco.dk

About FRIWO

FRIWO is a world famous producer of power supplies and chargers. The main products are switch mode power supplies and chargers for NiCd/NiMH, lead acid and Li-Ion batteries. Several of the FRIWO products are with exchangeable primary plugs. www.friwo.de
